# CHEMICAL STORAGE CABINET

# Chemical Storage Cabinet

Free up space in your workshop by safely storing your dangerous goods, including chemicals, corrosives and flammables, outside in a secure, lockable Chemical Storage Cabinet.

## Key Features

- Stores two IBC's with shelving on top for small packages
- AS1940 compliant
- Forklift pockets in both directions for ease of movement onsite
- Ground Anchor points
- Bunded floors for easy spillage cleanup
- Safely store chemicals, corrosives and flammables

## Details

SCF's Chemical Storage Cabinet is designed for space constrained sites. It comes standard with 6 shelves for the storage of chemicals, corrosives and flammables in multiple small packaged items.

It can also be reconfigured for the storage of two IBC's with shelving above the IBC's for the additional storage of small packaged items

Keep your hazardous goods secure with the external lock whilst keeping workers out of harm's way with the use of the interchangeable placard signage plate located on the external doors.

As with all SCF Dangerous Goods products, the Chemical Storage Cabinet comes with an internal escape mechanism for peace of mind for your employees.
